Front-end Developer   Email ID: karthikeyan020304@gmail.com

Career Objective:

Oriented and highly motivated MCA graduate seeking a challenging position as a software developer where I can leverage my programming skills, strong analytical abilities, and passion for technology to contribute effectively to the success of Organization. Eager to apply my academic knowledge in a practical setting, I am committed to continuous learning and professional development to stay abreast of emerging technologies and trends in the dynamic field of computer applications.

Technical Skills:

- • Web Technologies: HTML, CSS,JavaScript,React

- • Programming Language: Python

- • Database: MySQL

- • Operating System: Windows

Projects:

1.Pizza Sales with MySQL

Description:The Pizza Sales Database Project aims to streamline and manage the sales process of a pizza restaurant by designing and implementing a comprehensive SQL database.

Outcome: The project's primary goal is to enhance the restaurant's operations, improve customer experience, and facilitate data-driven decision-making.

2. student database management system

Description: A Student Database Management System is a software for storing and managing student information, like personal details, academic records, and enrollment status

Technologies used: python,MySQL.

Outcome: It simplifies administrative tasks, enhances data accuracy, and provides analysis reports for educational institutions, making student management more efficient and organized.

3. Expense tracker

Description: An expense tracker using Python and MySQL is a financial management tool that records and categorizes expenses.

Technologies used:Python,MySQL.

Outcome: It allows users to input and monitor their spending, providing insights into their financial habits through a secure database, aiding budgeting, and facilitating better financial decisions.
